We create products that investors and clients love

Our History

Arcanium is a rock solid USA based tech team at your disposal. Our team comes from a startup background, having built everything from phone systems to artificial intelligence and real-time web applications. Nick Bryant, the CEO, was a senior engineer at Sharpspring.com, Outreach.io and NASA Ames prior to starting Arcanium.

Our team includes an Oxford Ph.D., biomedical engineers and fortune 500 consultants.

Scaling is Hard.

Most people get into the tech world because they are extremely talented and they love **helping customers**.

Along the way, they begin to feel alone. That few people really understand the **opportunities** out there.

It turns out that the other **passionate**, **motivated**, and **talented** people are out there starting companies of their own!

So you spend a lot of time hiring, but it feels like searching for a needle in a haystack.

What's the answer?

.

..

...

Partner with entrepreneurs,

Don't **hire** more worker bees.

And **grow** your offerings!

White Labeled Service

The Arcanium team is composed of 2-4 person teams, each team led by a **customer-facing** consultant.

These consultants are **entrepreneurs**.

They **launch products**, **build solutions** and **strategize** with clients.

Here's how it works

1. You **send in a work request**
2. We introduce you to our consultant.
3. They solve your client's problem
4. You get paid

Want to Stay In Control?

We get it. Maintaining quality is of the utmost importance.

So stay in the loop and manage the project. We will provide you the [expertise](#) and [team bandwidth](#) to get the project done flawlessly.

At this point, you might want to check out our [portfolio](#) and [offerings](#)

The next step is simply to [try us out](#).

Request an Estimate

Going offshore is a huge gamble. Going **onshore** can provide a huge boost to delivery velocity and quality of work. With Arcanium, you get a solid tech team, without the agency overhead.
